EDUCATION

University of California, Berkeley | College of Computing, Data Science, and Society *May 2029*
B.A. Data Science & B.A. Statistics *4.0/4.0*
Relevant Coursework: CS61A - Structure and Interpretation of Computer Programs, STAT 20 - Introduction to Probability and Statistics

PROFESSIONAL EXPERIENCE

Milpitas Unified School District **June 2026 - Present**
Data Analytics Intern *San Jose, CA*

- Built **Python/SQL** data pipelines to clean, transform, and analyze **15,000+** device-health and IT asset records across 10+ school sites, using **pandas** to identify hardware failure, battery degradation, & repair trends, informing district-wide replacement decisions.
- Automated device diagnostics and reporting with Python and **shell scripting**, consolidating hardware, OS, and inventory data into analytics dashboards and reducing manual validation time by **65%** across **800+** Chromebooks and MacBooks.

Young Researcher's Institute **June 2025 - Aug 2025**
AI & Machine Learning Researcher *Milpitas, CA*

- Engineered & analyzed **122K+ NYC housing records** across ACS, eviction, 311, and school datasets; trained & evaluated Random Forest model achieving **86% accuracy** to identify high-risk neighborhoods & predict housing insecurity 1–2 months in advance.
- Applied SHAP across **15+** socioeconomic indicators to identify key drivers of housing instability and interpret 10K+ model predictions; translated findings into an in-depth ML research manuscript published in Women Chronicles.

FalconX Accelerator **April 2026 - June 2026**
Data Analytics Intern *San Jose, CA*

- Analyzed user engagement data across 3 digital learning platforms using Python, SQL, and Tableau; built interactive dashboards uncovering key drop-off patterns and behavioral trends, driving an **18% increase in click-through rates.**
- Identified key retention bottlenecks through funnel and cohort analysis, translating user behavior insights into data-backed UX and workflow improvements that informed a platform-wide pilot targeting a **25% increase in user retention.**

Sam Liccardo Congressional Campaign **June 2024 - August 2024**
Data Analytics Intern *San Jose, CA*

- Processed and segmented **5K+ voter records** using Excel and Google Sheets, developing demographic and precinct-level targeting models to identify high-priority voter segments, uncover engagement patterns, and optimize outreach allocation.
- Built automated tracking and reporting systems across **10+** campaign workflows, synthesizing voter contact, volunteer, and precinct-level engagement data to measure outreach performance and improve overall targeting efficiency.

LEADERSHIP EXPERIENCE

Santa Clara County Youth Task Force **May 2022 - June 2026**
Vice Chair, Data & Research Lead *Santa Clara, CA*

- Selected as **1 of 16** commissioners representing **500,000+ youth** across Santa Clara County in youth policy and advocacy
- Conducted countywide youth mental health research and analysis that helped secure **$13.2M in funding** for school wellness centers.

Milpitas Youth Advisory Commission **May 2021 - June 2026**
Chair, Subcommittee Lead *Milpitas, CA*

- Appointed **1 of 7** commissioners representing **16,000+** Milpitas youth in city policy, civic initiatives, & youth-focused programming
- Launched Milpitas' first youth-led coding competition, engaging 60+ students, securing $1,000+ in prizes, & expanding stem access

PROJECTS

CivIQ | Python, Flask, JavaScript, HTML, CSS, SQL

- Processed **2M+ public records** using Python and SQL, engineering automated data pipelines to clean, merge, and structure large-scale government datasets and generate quantitative insights across **10+** published civic research reports.
- Built a Flask-based civic data platform with interactive visualizations and dynamic data exploration tools, transforming complex public datasets into accessible findings and data-driven reports reaching **7K+ readers** across **12 countries.**

Vigilance | Python, React Native, Firebase, HTML, CSS, JavaScript

- Developed a **mobile driver-safety app** integrating 3 real-time detection systems for road hazards, driver distraction, and drowsiness.
- Built **10+ interactive screens** and user flows across 3 safety modules, prototyping road scanning, attention tracking, & driver alerts.

Women in STEM Analytics | Python, SQL, R, pandas, tidyverse, Tableau

- Built an end-to-end **Python, SQL, & R analytics** pipeline to process 10K+ workforce observations across U.S. STEM occupations, applying statistical analysis across **20+ indicators** and developing Tableau dashboards to identify trends in women's employment

TECHNICAL SKILLS

Languages: Python, R, Java, JavaScript, HTML/CSS, SQL, Typescript, Go
Frameworks/Libraries: React, Next.js, Node.js, FastAPI, PyTorch, pandas, NumPy, tidyverse, Spark, TensorFlow
